FEATURES

Exterior Locking

Previously unimaginable, Pico offers **exterior access** with even panel configurations—unlocking a new range of design possibilities.

Energy Efficiency

Harnessing the natural thermal properties of wood, combined with advanced thermal breaks and high-performance glass, Pico delivers exceptional efficiency—meeting California's stringent Title 24 standards.

U-Factor = 0.29 SHGC = 0.22

I89 Glass: U-Factor = 0.25 SHGC = 0.21

Engineered for Strength

The reinforced aluminum exterior, featuring a **1/8" thick architectural reinforcement** design and LVL core, ensures exceptional strength and stability.

Thin Stiles & Rails

Featuring sleek **1 ⅞" stiles and rails,** Pico Bi-fold Door Systems redefine contemporary architectural design—expanding views and maximizing natural light.

Concealed Hinge

Concealed stainless steel hinges deliver a clean, modern interior look with no visible hinges - available in stainless or black stainless steel.

Size Matters

With panels up to **4' wide and 10' high, configurations can include up to 16 panels** for a dramatic, open-air feel. The floor-to-ceiling design increases the sense of space, adds a touch of luxury, and complements both modern and traditional homes.

Concealed Pull Handle

Staying true to Pico's minimalist design, the **hidden pull** along the panel edge ensures effortless operation and strength, all while remaining discreet.

Reliable Shootbolt Rods

Corrosion-resistant, stainless steel rods offer reliable performance under frequent use - providing strong locking points that increase the overall security of the door.

PICO

Since 1986, AG Millworks has been dedicated to crafting custom all-wood and clad doors and windows, using the finest materials and the latest technology. As we celebrate our 40th anniversary, we're excited to unveil our luxury Pico Bi-fold Door System. With an **ultra-sleek 1 ⅞" stile,** concealed hinges, an exterior shootbolt lock and superior thermal efficiency. This system is engineered to support panels up to 4 ft wide and 10 ft tall - creating an impressive opening up to 64 ft wide with as many as 16 panels. The Pico Bi-fold Door System redefines the limit of modern design.

AG MILLWORKS 40 Years ANNIVERSARY

The Pico Bi-fold Door System inherits all the hallmark benefits that have driven AG Millworks' success for 40 years:

- Comprehensive factory inspections
- Factory-installed, retractable screens
- Pre-drilled header holes
- Pre-installed hardware wherever possible
- Fully assembled frames delivered either in-store or directly to jobsite

As part of our exclusive product line, Pico Bi-fold Door Systems reflect the craftsmanship and innovation that have made AG Millworks a trusted name in the industry.

MINIMAL DESIGN

Pico's ultra-sleek 1 ⅞" stile sets a new standard for minimalist modern design, allowing more natural light and sweeping views. The thin stiles & rails create a smooth indoor-outdoor transition while advanced glazing ensures energy efficiency. Combining style and performance, Pico doors are a smart, value-boosting upgrade for any home.

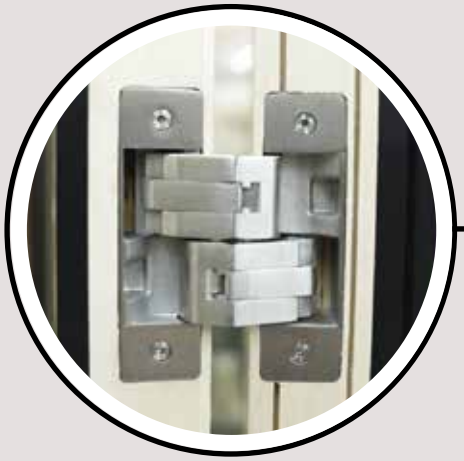
1 ⅞"

CONCEALED HINGES



Pico Bi-fold Doors feature stainless steel concealed hinges that offer a sleek, modern look without visible hardware, keeping the focus on the view. Integrated into the stile, these hinges are protected from the elements, reducing wear and tear. The result: smooth operation, low maintenance, and lasting performance.

OPEN SPACES

With panels up to 4’ wide and 10’ high, configurations can include up to 16 panels for a dramatic, open-air experience. Their sleek, floor-to-ceiling design enhances spaciousness, adds luxury, and suits both modern and traditional styles—perfect for effortless entertaining and elegant living.
